**\*\*Passmark.com's "benchmark testing" makes it easier to compare processors. Cryptic names and varying operating frequencies as well as the number of processor cores can make it difficult to know which CPU is the best value. We use Passmark's numbers and chose the CPUs that give you the best bang for your buck. Look up your current CPU at [http://www.cpubenchmark.net/cpu\\_list.php](http://www.cpubenchmark.net/cpu_list.php) to compare it against new ones. Scores are subject to change over time.**
